

Marketing website with **Krafty koncepts.**

Krafty koncepts is a starter template for startups, marketing websites & landing pages. Built with krafty.build and TailwindCSS. You can quickly any website with the starter.

[Download for Free](#)[GitHub Repo](#)

Everything you need to start a website

Krafty koncepts comes batteries included. It takes the best parts of state-of-the-art tools and adds its own innovations.

Bring Your Own Framework

Build your site using React, Svelte, Vue, Preact, web components, or just plain ol' HTML + JavaScript

100% Static HTML, No JS

Astro renders your entire page to static HTML, removing all JavaScript from your final build by default.

On-Demand Components

Need some JS? Astro can automatically hydrate interactive components when they become visible on the page.

Broad Integration

Astro supports TypeScript, Scoped CSS, CSS Modules, Sass, Tailwind, Markdown, MDX, and any other npm packages.

SEO Enabled

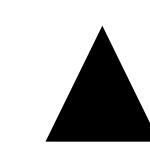

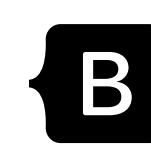

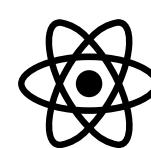

Automatic sitemaps, RSS feeds, pagination and collections take the pain out of SEO and syndication. It just works!

Community

Astro is an open source project powered by hundreds of contributors making thousands of individual contributions.

Works with your technologies

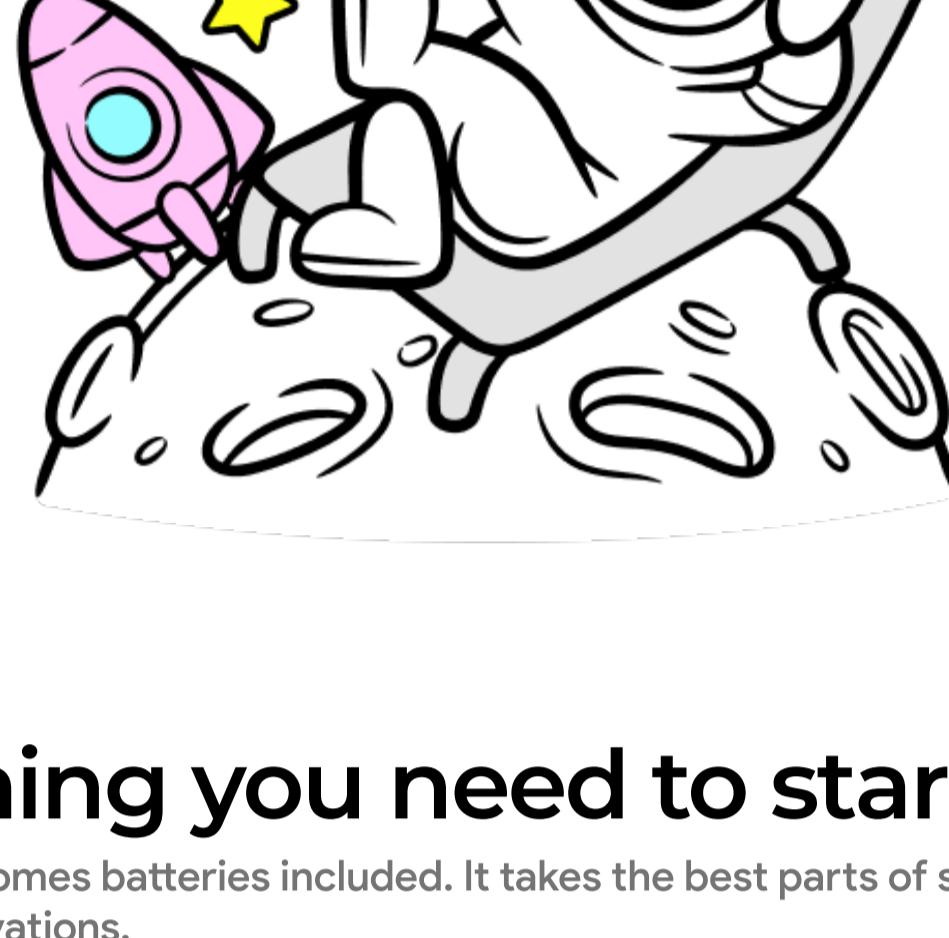

Build faster websites

Pull content from anywhere and serve it fast with Astro's next-gen island architecture.
